Summary

I focus on building functional applications across web and mobile, supported by a strong interest in competitive programming (LeetCode Knight, 1850+ rating). My experience ranges from delivering freelance projects to developing administrative tools for university use, with a focus on writing maintainable and secure code.

Technical Skills

Languages: Java, Kotlin, Python, C, JavaScript

Frameworks/Libraries: Flutter, Spring Boot, Express.js, Next.js, Tailwind CSS, Shadcn UI

Tools/Cloud: Azure, Supabase, Firebase, PostgreSQL, MongoDB, Docker, Git, GitHub, Vercel, Render, Postman

Experience

Freelance Full-Stack Developer

Jan 2025 – Mar 2025

Project: Luthor E-commerce Platform

- Engineered an e-commerce platform using **React.js** for frontend and **Spring Boot** for a robust microservices backend.
- Architected a relational schema in **PostgreSQL** to manage complex product catalogs and user orders efficiently.
- Implemented secure user authentication and session management using **Firebase Auth**.

Technical Projects

Voice-Enabled Leave Management System

JNTU-GV University

Stack: Flutter, Express.js, Supabase, Azure Blob Storage

- Developed a cross-platform mobile application for faculty at **JNTU-GV** to submit leave requests via voice recordings, reducing administrative overhead.
- Engineered an asynchronous audio upload workflow to **Azure Blob Storage** and built a secure HOD dashboard for real-time tracking and approval/rejection of requests.

PulseView: REST API Monitoring Extension

[GitHub](#)

Stack: JavaScript, Chrome APIs

- Engineered a Chrome developer tool using the **chrome.webRequest API** to intercept and analyze real-time HTTP traffic (GET/POST/PUT) across browser tabs.
- Built an interactive dashboard with **D3.js/Chart.js** to visualize API latency and traffic patterns in real-time.

SQLi Lab: Cybersecurity Education Tool

[GitHub](#)

Stack: Python, Flask, PostgreSQL, HTML/CSS

- Designed a deliberate vulnerability lab to demonstrate various **SQL Injection (SQLi)** vectors, including Union-based, Boolean-based, and Error-based attacks.
- Developed a comparative "Secure Mode" module that utilizes **parameterized queries** and ORMs to illustrate defensive coding practices and effective vulnerability mitigation.

Leadership Experience

President - Association of Computer Intellects (AsCI)

October 2025 – Present

GVPCE, Visakhapatnam

- Spearheading a premier technical club of **40+ members**, overseeing the execution of 5+ technical workshops and competitions annually.
- Mentored junior developers in web technologies and organized peer-to-peer learning sessions.

Education

Gayatri Vidya Parishad College of Engineering

Aug 2023 – June 2027

Bachelor of Technology in Computer Science and Engineering

- CGPA: 8.4 / 10.0**
- Relevant Coursework:** Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOPS.
